EXPAND • EXPLORE • EXPERIENCE

POWERED BY: *Scribido*

Dear parents, students face many challenges in this world; inner challenges, societal challenges; challenges in relationships and the challenges they have to face from nature. We adults, just ignore these challenges, because we ourselves are busy with our own challenges.

Raising and nurturing children is the prerogative and responsibility of each and every parent, but what we actually do is nurturing our children on a trial and error basis which according to me is not a comprehensive way of parenting. Parenting is a life-long journey and each of us, as parents should imbibe skills to bring about an all around development of our children. The need of the hour is 'effective parenting'. 'Effective parenting' is all the more important due to the challenges of modern life. Therefore, I urge all of you to undergo parental workshop so as to connect and keep in pace with your child. Knowing which healthy methods are best for one's child during parenting is time consuming but a rewarding effort.

Of course, the school plays a pivotal role in molding, shaping and exploring their innate talents. The child can shed his fears and inhibitions and become confident and successful only when it happens through the shared understanding of parents and schools.

It should be our resolve to provide them a stimulating and secure environment both at school and at home so that chances of frustration, anxiety, fear and uncertainty are reduced as much as possible. Encouragement, praise and appreciation are more effective than fault-finding, reprimanding and scolding or ridicule. The children will definitely blossom if they have the feeling of belongingness and acceptance. This is the goal which I want to achieve and for this I request you to stand by me, together we will and we can.

Dear Parents, have you ever introspected or given a thought about what our children really want or yearn for? The answer is simple; your patient hearing and guidance. Due to advance of technology and modernization our children are maturing way ahead of their age this is the effect of modern way of life which we cannot ignore at any cost. Therefore if they have problems, they expect quick solutions; so when we ignore them or turn a blind eye towards their problems; they try to find solutions on their own or from other sources which might not be safe for them. The key to your child's well-being is in your own hands. You have to focus on each and every attribute of your child's upbringing; right from the foul language she/he is exposed to or the time she/he spends in front of the T.V. screen or to the company of friends she/he mingles with, her/his hobbies, her/his passions, everything.

When you raise your child, she/he is nurtured and is exposed to the protective confines of the home environment. Parents tend to forget that their children will flap their wings and take a leap in this big, giant world where they will be facing a number of challenges and hurdles. The role of the school becomes important here, it is the responsibility of the school to give strength to their wings so that they achieve glory in whichever journey they embark on.

In keeping up with our tradition, School, this year has adopted novel and child-centric ways of learning. Our aim is to make teaching learning process easy, fun-filled and interesting. The idea is to ensure that the children do not feel burdened and enjoy the teaching-learning process.

Everyone wants their child to become a doctor or an engineer; but my million dollar question is, "Do we want our children to become simply doctors and engineers or do we want our children to become doctors and engineers with heart and a humane touch?" Let us pledge to instill that humane touch and help in building a secure world for them.

Our focus is to achieve a balance between academics and co-scholastic activities as we believe that both are integral and indispensable elements for our student's upbringing. Therefore, school has incorporated an array of activities that will cater to these key components and give your child a whole-some teaching learning experience.

A dream doesn't become reality through magic; it takes sweat, determination and hard work. Allow your child to work hard; do not provide everything easily in the platter. Allow them to earn everything through hard work. Let them learn that nothing can replace hard work. "The garden of your dreams should be watered and nurtured by the sweat of excellence."

I make a commitment to you all, to always keep my doors open for you as I believe in the holistic development of my students. This can happen when your strength and your trust make strong roots in me. To create a cohesive teaching learning experience let us be partners in their growth and gain from each other's support and help them in their pursuit of excellence.

The idea is to face challenges collectively as parents, educators and most importantly as human beings and create a journey of life which will mold a distinct future for your children.

'The woods are lovely, dark and deep; But I have promises to keep and I have miles to go before I sleep.'

Mrs. DIVYA BORSE (Our Dear: Jayashree ma'am)

1. Please take a moment to describe yourself.

Ans: I am a hardcore teacher, who is passionate about my job...I love working with children.

2. How would you describe your class management style?

Ans: I believe in students' empowerment. I prefer being a facilitator and help students implement their innovative plans. I like to be a part of my students' acts. Being a part of the plan of my students enhances their relationship with a teacher making it an ideal teacher-student relationship. When students execute their own plans then their self-confidence is enhanced and then they develop heart to take the accountability and responsibility of things. I think this courage will help India get included in developed countries soon.

3. What are your strategies to help slow learners?

Ans: According to me, slow learners do not exist. They are the students who have exceptionally designed brains to do wonders in the world. Students who are not interested in a particular field, try to make the learning advances in them slower, thus categorizing them as "slow learners". I believe if we can identify their area of interest we can help them achieve their goals faster.

4. What do you think about the coming generation being a part of global India?

Ans: The young generation is very straightforward; they never manipulate the answers they give. They will say a straight away no or a straight away yes....Also if you are honest to them, they are honest to you. I believe the youth will change the world by their courage, honesty and innovative ideas.

5. What gives you a feeling of accomplishment? Can you share any such situations?

Ans: I like working with students. The process of follow ups removes the hurdles of students. Motivating teachers to appreciate each and every step of success and finally when I see the total turnover in students then I get a feeling of accomplishment. I enjoy the team work and feel happy and complete when something is achieved as a team.

6. According to you, how important is reading in a student's life?

Ans: Yes, it is really important for one to read, as reading helps to enhance one's language but it really depends on your choice because listening is also as necessary.

7. What is your message for students and teachers?

Ans: For students: Only you and you can change the world. You need to have a positive perspective and zeal to change negatives into positives. Be true inside and outside to be successful, and when you work for happiness and blessings, success will follow you. Teachers: Teachers, you are blessed to be the candle in the darkness for every individual in this holy temple of education.

Miss. Shreya Parekh

Shreya Parekh Won Gold medal at National Level Rifle Shooting Championship in Telangana

1. Apart from rifle shooting, what are your other aims?
Ans: I do not have any particular aims in my life but I love reading books especially books concerning law. I would love to pursue a career in the law firm, being a defense attorney, with a huge library to read books from.
2. Is rifle shooting your passion or career?
Ans: Rifle shooting is my passion, not my career. Anything you love is not work but your passion. If anything you do seems work for you, you aren't doing what you ought to do.
3. Have you witnessed any changes in you as a person after joining the sport?
Ans: Yes, definitely. Previously I was not a disciplined person but when I started pursuing my passion, I became more disciplined which was important as well as necessary for doing anything.
4. Do the journeys from the first, second and the third gold medal vary?
Ans: They definitely vary. I received quite a lot of medals [not to brag about them] and when you reach a position where everybody likes to see themselves, then you feel like you are on cloud nine. The first medal I got was on a small scale and the medal I got now is quite a big achievement for me but the happiness is equal for all the medals I have achieved.
5. Competing with whom was the most difficult for you?
Ans: All the competitors in this sport were extremely proficient. It was tough competing with the people whose tactics are not known to you. A girl named Miss. Shikha Nanda was my toughest competitor amongst all the other participants I faced.
6. How did your story to success kick off?
Ans: I had no idea how I got into the sport of rifle shooting. I guess it was only a thought which helped my story to kick-off.
7. Apart from sporting, what else do you like?
Ans: Apart from sporting, I fancy reading books. You give me any book; I will start reading and complete it within... like a day. When I read books I get so wrapped up in them that I forget my surroundings and often laugh out loud, when some of my mates who usually sleep in the bus, get ruffled up and wake up jolting. I also enjoy listening to music compositions and hum along to a tune whenever and wherever I can.
8. So, since you are interested in books, which book would you recommend others to read?
Ans: Books of 'PERCY JACKSON' and also Twilight, Harry Potter, Lord of Rings, Hunger Games trilogy, Perry Mason books are all about detective and law. All these keep you spellbound towards reading. Reading helps you concentrate.

Kshatriya Nitin Vekhande of Grade III won 1st Prize in Under 7 District Chess Championship

Priyansh Bharat Jain of Grade VI won gold medal in SAEVUS Natural Capital Olympiad

Vedant Vivek Kaneri of Grade V National Champion in Abacus 2016

Ravitosh Suryanarain Verma Of Grade VII Won Bronze Medal In State Level Sub Junior Judo Championship

Vedant Nitin Vekhande of Grade IV Won 1st Prize in Under 9 District Chess Championship & also won Mumbai Chess Rapid Championship

Sahil Mahesh Limaye of Grade X selected among the top students in the country to compete in 2017 Microsoft Office Specialist India Championship

Winner Of International Level Football Match In Nepal

National Yoga Competition Held At Haridwar Conducted By CBSE. Arya Gurukul Got 7th Possition. 125 Schools Participated

The Seasons

Seasons, seasons all year long,
The monks are striking on the gong.
Monsoon winds are soiling here,
The elephants and the deer.
Summer sun's scorching hard,
For the life of deer, monkeys guard.
Winter winds are making it cool,
All the snow in the pool.
Autumn season makes leaves shed their leaves,
After this period green leaves they receive.
Coldness shows the upcoming year,
In the wild the hunting bear.
This is the cycle that is strong,
Seasons, seasons all year long.

Soham Kenjale
Grade VI

My Dream

The previous years were tough,
But not impossible.
I came to know I liked someone,
Her beauty just pierced my heart,
Now nothing could bring me apart.
In my college hours I gladly
Say 'she's just with me',
But at sleepy nights I am like
"What's happening to me?"
Just get out of vision you're just a dream,
But how much I panic,
I sink like Titanic.
But what can I do,
My dream just shook me.

Soham Kenjale
Grade VI

Nature Of Our Earth

I want to feel the mud,
And see the beauty of a bud.
I want to play in the sand,
And hold the pebbles in my hand.
I want to taste the nature of our earth,
To Whom God has given the boon of birth.
I want to know how it's provided,
The beautiful flowers, delicious fruits,
And the mighty trees,
Followed by a golden breeze.
I want to enjoy it,
Because of whom I'm fit.
I want to feel the mud,
And see the beauty of a bud
I want to play in the sand,
And hold pebbles in my hand.

Soham Kenjale
Grade VI

My Mom

White is the Dove,
The Anagram of Mom is WOW,
She shouts at me with love,
But I don't know how?
Days and nights she works for me,
But I am unfortunately asleep,
I want to see,
But how can I see in my dreams deep?
She gave me birth,
By feeling so much hurt.
She supported me back & forth,
And also, she removed my dirt.
For me it was a small step,
But for her a giant leap.
Now I'll take her care, yep!
Till then
When she slowly sleeps.
MOM I'LL HELP YOU,
IN BAD TIMES TOO

Aadya Dhotre

Performing Arts

ART, what do we understand by these three letters? Paintings, drawings, master pieces? The world of arts doesn't stop here. It has a long way to go....

Every day we create different art pieces but, have you wondered why we create them, for entertainment perhaps? But, it has something else to do with. Art is used for expressing our ideas, thoughts and feelings. It is just like the Homo sapiens who used to create cave paintings on what they hunted and how they hunted. It is also like our modern artists, who draw what comes into their mind.

Harshavarthini
Grade VI

I rush across the road
To get on board
To the bus that's waiting,
to get me to school
My uniform is clean and
My bag is filled
With the tiffin in the pouch
And a bottle of water
And lots of books
But across goes my sight
To a very sad plight
Children in rags and a
Load on their head
No place to stay, no school to go to
No uniform to wear, no books to learn
That is there end
As they have no money to spend
With little to eat
In hunger do they sleep?
With no one to care
And nothing to wear
With nothing for the present,
Then what about the future?
I feel very sad
As what I have seen is very bad
In silence do I ponder?
About their future do I wonder?
Is there nothing I can do?
But I know someone who can do.
I lift up my eyes to the sky,
And let a silent prayer fly
God!!!Are you not there!!

Jonan Johnson
Grade VII

Today I hurry off to school
To work and learn and play
I'm in a brand new grade this year
What a happy day.

I've re-watched every return
I have no skin on my knee
I've had it with the crickets
The sunburn and the bees.

It's always a struggle to get out of bed
As we cry 'mum'
Please let me rest my head
We dress in our houses
With white and maroon
T-shirts and pants
Pity summer is over soon.
